LES CHARGEURS EN SERVICE

Paysagistes

Travaux Publics

En 1990, la société Takeuchi développe et commercialise pour la première fois le premier chargeur sur chenilles de caoutchouc (Track Loader). La mini pelle sur chenilles d'un poids de 1,6 tonne est présentée la même année au CONEXPO de Las Vegas.Un produit novateur adapté aux terrains boueux grâce à sa portance et à sa stabilité inégalées, convenant parfaitement aux applications plus lourdes grâce à sa force puissante de traction qui en fait le Leader dans sa catégorie. Takeuchi propose une gamme de chargeurs compacts allant de 2,6 t à 5 t, pour 52 cv à 98 cv, tous équipés de série d'un système hydraulique à détection de charge, d'un système de godet flottant, de commandes hydrauliques servo-assistées, de cabines basculantes certifiées ROPS-FOPS, et de nombreux autres équipements...
